

# SafeSwitch

An iAppSys Oracle Cloud Solution

**ORACLE** Specialized Partner  
Certified Cloud Solutions Provider

**Come out ahead with an iAppSys SafeSwitch migration of your Oracle or non-Oracle applications and DB workloads.**

Zero initial investment, fast ROI, immediate savings.

**About this graph:** This graph is based on a hypothetical example where current infrastructure costs are \$15,000 per month, and a new Oracle Cloud solution is \$10,000 per month.

## Don't pay twice... use SafeSwitch!

### OUR METHODOLOGY, STEP BY STEP

Let's say your current monthly infrastructure costs are \$15,000 per month.

iAppSys proves to you a move to the Oracle Cloud means a lower monthly cost of only \$10,000 per month.

However, a migration may also mean you need to incur the costs of two cloud environments simultaneously - your current infrastructure costs, plus the new Oracle Cloud server.

**Here's where SafeSwitch comes in.** iAppSys will migrate your Apps & DB infrastructure to Oracle Cloud in < 90 days, pay 100% of your Oracle Cloud costs the first month (i.e. \$10,000 in this example), and a minimum of 50% of your Oracle Cloud costs the second month - meaning a faster return on investment for your company, and greater savings overall for the year.

# GUARANTEED INFRASTRUCTURE AND ANNUAL SUPPORT SAVINGS IN UNDER 90 DAYS!

### Average SafeSwitch Cost Savings:

**AWS** = 30%+

**Azure** = 45%+

**Regional DC** = 60%+

Savings increase for **Oracle DB** clients
