SafeSwitch

An **iAppSys** MySQL Managed Database Solution

Come out ahead with an iAppSys SafeSwitch migration of your MySQL DB into OCI by leveraging Oracle's MySQL Database Service.

Zero initial investment, fast ROI, immediate savings.

● iAppSys SafeSwitch Migration
● Migration without iAppSys

Dramatic savings by Month 12 that will keep growing

Net Cloud Savings start immediately Month 4

iAppSys provides cloud credits and migration Months 1-3

+ CLOUD SAVINGS

− CLOUD COSTS
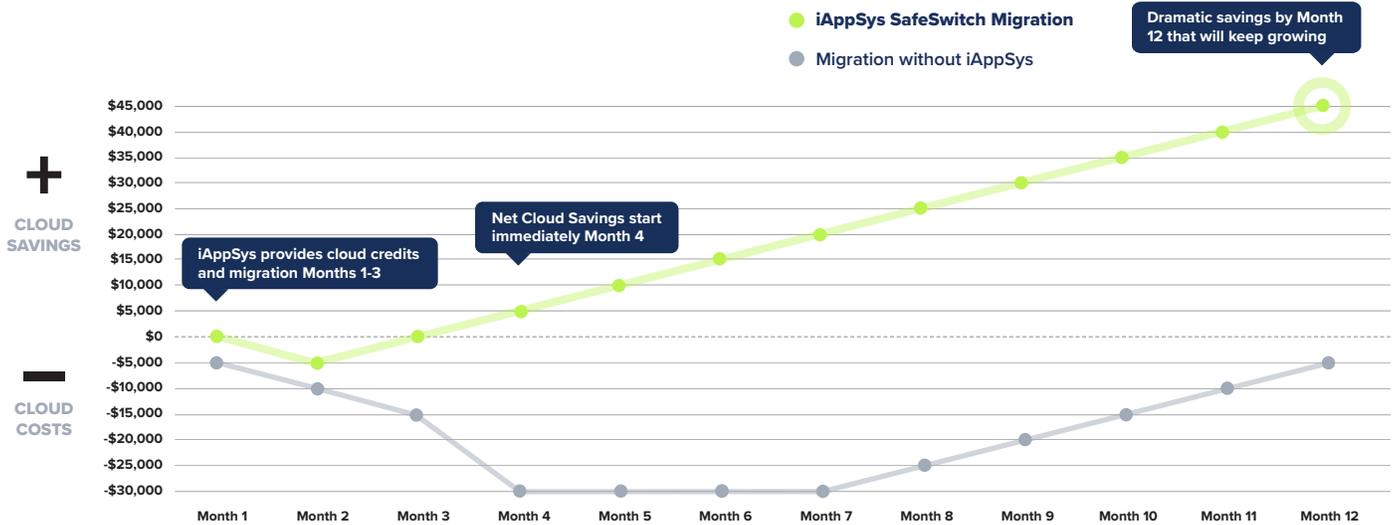

About this graph: This graph is based on a hypothetical example where current infrastructure costs are $15,000 per month, and a new Oracle Cloud solution is $10,000 per month.

Don't pay twice... use SafeSwitch!

OUR METHODOLOGY, STEP BY STEP

Let's say your current monthly infrastructure costs are $15,000 per month.

iAppSys proves to you a move to the Oracle Cloud means **a lower monthly cost of only $10,000 per month.**

However, a migration may also mean you need to incur the costs of two cloud environments simultaneously - your current infrastructure costs, plus the new Oracle Cloud server.

Here's where SafeSwitch comes in. iAppSys will migrate your Apps & DB infrastructure to Oracle Cloud in < 90 days, pay 100% of your Oracle Cloud costs the first month (i.e. $10,000 in this example), and a minimum of 50% of your Oracle Cloud costs the second month - meaning a faster return on investment for your company, and greater savings overall for the year.

GUARANTEED INFRASTRUCTURE AND ANNUAL SUPPORT SAVINGS IN UNDER 90 DAYS!

Average SafeSwitch Cost Savings:

AWS = 30%+

Azure = 45%+

Regional DC = 60%+

Savings increase for **Oracle DB** clients
