CLOUD COSTS
About this graph: This graph is based on a hypothetical example where current infrastructure costs are $15,000 per month, and a new Oracle Cloud solution is $10,000 per month.

Don't pay twice... use SafeSwitch!

OUR METHODOLOGY, STEP BY STEP

Let's say your current monthly infrastructure costs are $15,000 per month.

iAppSys proves to you a move to the Oracle Cloud means **a lower monthly cost of only $10,000 per month.**

However, a migration may also mean you need to incur the costs of two cloud environments simultaneously - your current infrastructure costs, plus the new Oracle Cloud server.

Here's where SafeSwitch comes in. iAppSys will migrate your Apps & DB infrastructure to Oracle Cloud in < 90 days, pay 100% of your Oracle Cloud costs the first month (i.e. $10,000 in this example), and a minimum of 50% of your Oracle Cloud costs the second month - meaning a faster return on investment for your company, and greater savings overall for the year.

GUARANTEED INFRASTRUCTURE AND ANNUAL SUPPORT SAVINGS IN UNDER 90 DAYS!

Average SafeSwitch Cost Savings:

AWS = 30%+

Azure = 45%+

Regional DC = 60%+

Savings increase for **Oracle DB** clients

SafeSwitch
An **iAppSys** Oracle Cloud Solution

iAppSys is your guide to the Oracle Cloud

Your road to the cloud starts here.

STEP 5 (1-2 days)
Go-live scheduling
Final Migration / Cutover
Run and Maintain

STEP 4 **(2-10 days)**
iAppSys presents your platform build, and determines final migration dates with you.

STEP 3 (1-5 days)
iAppSys begins to build your platform architecture. Define parameters, roles, and build schedules of events.

STEP 2 (1-5 days) iAppSys creates your StopLight Report, designs your cloud architecture and assesses your potential ROI.

STEP 1 (1 day)
